

# Silicone Lion Mitten Teether

Silicone Baby Mitten Teething Chew Toy for Babies 0-12 Months Silicone Toddlers Glove Teether Toys Anti-Drop Teether Glove BPA-Free for Girls and Boys Sucking Biting Needs Soothing Gums Pain Relief

## Product Details Description

01

### Lion Mitten Teething Toy :

This Lion-shaped mitten teething toy features a kawaii hue that attracts children's attention and is easy to find. The internal holding stem is ergonomically designed for easy grip in the baby's little hand. It prevents the teether from falling off, reduces wrist contact, exercises your baby's hands, and protects them from finger bites.

02

### Functional Teether :

For babies 3 months and older. Unlike other wrist teethers, this mitten teether completely prevents your baby from biting, sucking and chewing fingers. The textured surface of the chew toy massages and stimulates the gums, making it ideal for aiding the eruption of front, middle and back teeth. Healthful teething activities help your child improve chewing ability, train the muscles that open and close the jaw, and promote the development of strong, healthy teeth and gums.

03

### Texture Simulated Design :

This teething toy provides a well-balanced soft and rough texture that allows your baby to enjoy more fun chewing. It will promote healthy growth and keep your child occupied and happy. The little lion's ears and hands are designed with convex points that can help relieve teething fussiness and pain by soothing and massaging your baby's swollen gums. There are no rough or sharp edges or barbs, so you don't have to worry about your baby getting hurt.

04

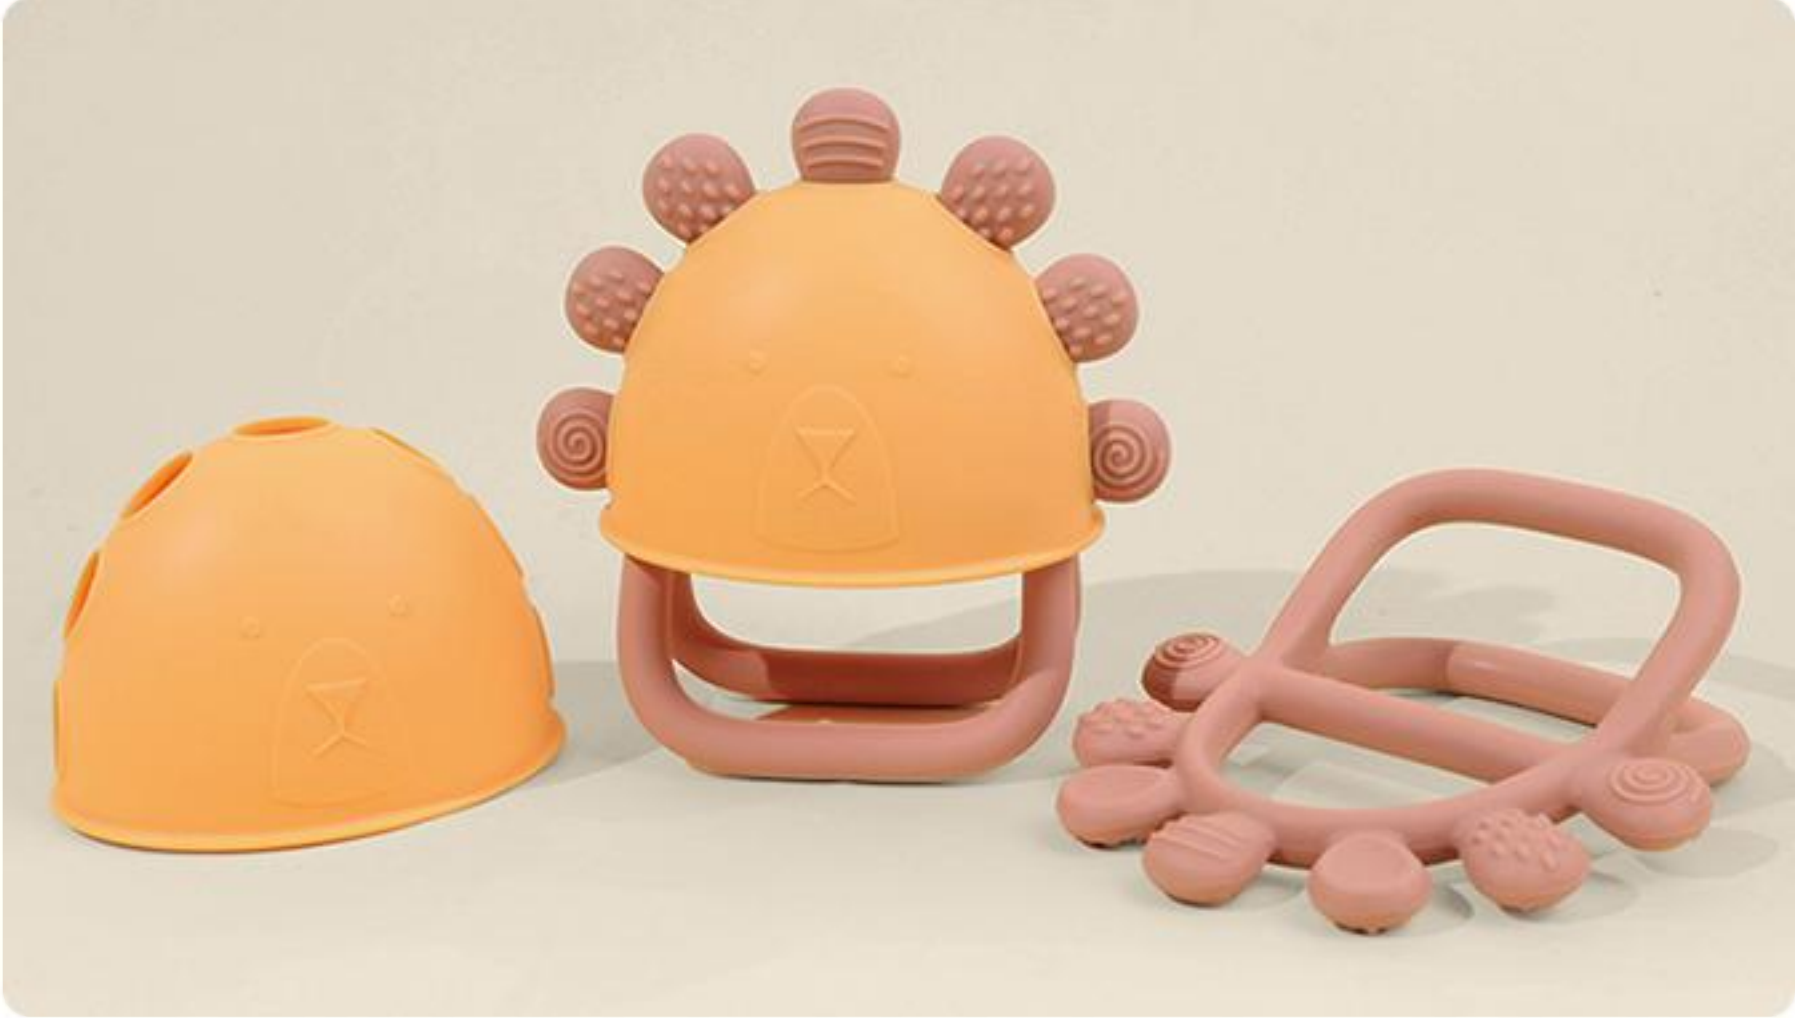

### Safe Material for Babies :

The teething toy is made from premium food-grade silicone that's free of BPA, PVC, latex, metals and phthalates. It is non-toxic, rust-resistant and safe for babies to nibble and munch on. The perfect size of the mitten teether makes it easy for little hands to handle and fits the baby's mouth without posing a choking hazard. Parents can buy this safe teething toy with confidence as it is designed with their children's safety and health in mind.

05

### Easy to Clean :

This reliable, safe teething toy features a detachable construction with good durability. It is simple to handwash with just water before and after each use. Dishwasher safe and it can be boiled and disinfected directly in hot water for reuse.
